OMEGA FEEDS

Simple ingredients - brilliant results.

The suggested feeding guide for Maxicoat

Introduce gradually to the ration – taking 10-14 days to reach maximum level. Mix in with your feed.

1. Horses under 250kgs start at 125 grams and increase to 250 grams over 10-14 days.
2. Horses 250-400kgs start at 185 grams and increase to 375 grams over 10-14 days.
3. Horses over 400kgs start at 250 grams and increase to 500 grams over 10-14 days.

We are well aware of the distinct nutritional advantages and results we gain by adding oil to our horse's diet:

- High energy density – 2.25 times the energy of carbohydrates.
- Source of essential fatty acids, linoleic and linolenic (Omega 3 and Omega 6).
- Reducing the problem of acidosis, laminitis and "firing-up".
- Cooling/calming source of energy
- To reduce grain in the ration.
- Coat shine and brilliant appearance

You can now choose between a processed oil supplement or MAXICOAT, which is a pure, natural, unprocessed source of oil.

MAXICOAT will provide all the benefits of oil supplements, plus:

	D.E. MJ/Kg	Crude Protein %	Fat %	Fibre %	Lysine (g/kg)	Ca. %	P. %
Liquid Oil	37.3	0	99.7	0	0	0	0
MAXICOAT	19.1	26.0	47.5	5.3	18.4	0.29	1.12

THIS PRODUCT DOES NOT CONTAIN RESTRICTED ANIMAL MATERIAL • AVAILABLE IN 10KG PAILS
