*Simple ingredients - brilliant results.*

## The suggested feeding guide for Weight Gain

1. Horses under 250kgs start at 250grams per day and increase to 500grams per day over 10-14 days.
2. Horses 250-400kgs start at 375grams per day and increase to 750grams per day over 10-14 days.
3. Horses over 400kgs start at 500grams per day and increase to 1kg per day if desired. Introduce into your feed over a 10-14 day period. Mix thoroughly with your ration.

To gain the optimum benefit from your feeding programme, ensure your horse is in good health, wormed regularly, teeth checked regularly and that your horse is getting enough exercise. As well as good quality hay, chaff or pasture. One standard feed scoop is equal to approximately 850grams of Weight Gain.

The nutritional function of Weight Gain is very specific - to increase body condition and body weight. It will help combine conformation, body condition, brilliant depth of coat colour and a relaxed disposition for that show and sale success you desire. Weight Gain is a formulation high in omega 3 and omega 6 fatty acids (fats) energy and protein. It is very palatable and high in digestibility.

**Ingredients:** Sunflower kernel, wheat pollard, bentonite, caramel extract, trace elements.
