

No-Grain PLATINUM

PERFORMANCE & WORKING HORSES

Non pelleted, Palatable, Cool energy, Keeps the hindgut healthy

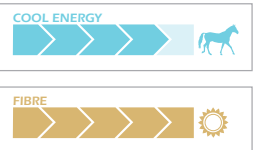

Omega Feeds has formulated the ultimate grain free formula with out the 'fizz'! The fibre base formula is a safe and non heating source of energy that will meet the needs of horses in medium to heavy work. Horses have evolved on fibrous feeds and have a limited ability to efficiently digest large amounts of grain. Grain based feeds are often responsible for causing laminitis, tying up, gastric ulcers and behavioural problems. As the name suggests, No-Grain Platinum does not contain grain, so the risk of developing these issues is greatly reduced.

In order to enhance the performance of these horses and reduce the incidence of these problems, people need to ensure they are correctly feeding their horses, as nutrition along with training will directly impact on how your horse performs!
